Introduction

»DIE kleine BRANDENBURG-STATISTIK 2015« (statistics for the federal state of Brandenburg 2015, key facts and figures) offers information on the development in the federal state Brandenburg based on the most important statistical results.

Benchmarks to demographic, economic, social, cultural and political structures of Brandenburg are presented in Chapter 1 to 27. The results are compared to previous years. The brochure also contains information on the administrative districts (Chapter 28), data on Brandenburg's development since 1990 (Chapter 29) and figures for the region of Berlin/Brandenburg (Chapter 30).

On December 31, 2014 the area of the federal state Brandenburg covered 29,654 km². The proportion of the agricultural area was 49 percent. The forest area comprised 36 percent.

In 2014, more than 19 thousand children were born alive in the state of Brandenburg. The number of deaths was around 29 thousand persons. The resulting mortality excess of more than 9 thousand people could be over adjusted through the registered migration surplus of around 18 thousand people, so a population growth of nearly 9 thousand people was quoted. At the end of 2014, the population was based on the 2011 census with 2,458 thousand people. This means for the first time since 2000 an, although low, population growth.

2014 were 1.23 million households in Brandenburg. Nearly 37 percent of them were single-person households. 235 thousand families with children under the age of 18 lived in Brandenburg.

In the school year 2014/15 approximately 232 thousand pupils visited general education schools, including about 10 percent independent school agencies.

In the winter semester 2014/15 there were around 50 thousand students in Brandenburg, including more than 51 percent women. 73 percent of students were enrolled at universities. 36 percent were students in the fields of law, economics and social sciences.

2014, practiced more than 9 thousand physicians and nearly 2 thousand dentists in Brandenburg.

The 56 hospitals in Brandenburg possessed about 15 thousand Beds in. The average length of stay was 7.8 days.

In 2014, there were approximately 10 thousand recipients of continual subsistence payment, 24 thousand recipients of basic security in old age and disability and more than 36 thousand benefits under the 5th to 9th Chapter of SGB XII.

With more than 11.9 million overnight stays in accommodation establishments in the federal state of Brandenburg in 2014, the numbers of previous year were again exceeded. With 4.4 million arrivals, the guest numbers also slightly increased. The average length of stay of tourists in Brandenburg in 2014 was 2.7 days.

Nearly 9 thousand dwellings were built in Brandenburg in 2014, 19 percent more than last year. 8 thousand new dwellings were built. Most of the dwellings created in Potsdam and the district Havelland. A total of nearly 8 thousand construction projects were completed in 2014 in Brandenburg. This was 9 percent more than last year.

In 2014 approx 18 thousand business notifications in Brandenburg were recorded. Approximately the same number of businesses were deregistered during the year.

Most of the movements were in the economic sector »Wholesale and retail trade; Repair of motor vehicles and motorcycles«, followed by the sector and »Construction« and »Administrative and support service activities«.

Brandenburg's economy grew by 0.8 percent in 2014. In the previous year, economic output had decreased by 0.2 percent.

In 2014, three national elections took place in Brandenburg. In addition to electing Members of the European Parliament and local elections also the election to the Parliament of Brandenburg took place. The SPD with 31.9 percent of the secondary votes is the strongest party, followed by the CDU with 23.0 percent and the party DIE LINKE with 18.6 percent.

»**DIE kleine BRANDENBURG-STATISTIK 2015**« gives an initial overview of the data provided by official statistics. A similar brochure has been published for the federal state of Berlin (»**DIE kleine BERLIN-STATISTIK 2015**«). Both booklets are also published in German. Comparative figures for the federal states interested can be found in the common statistics portal of the statistical offices of Germany and the federal states www.statistikportal.de.

The microcensus is a household survey conducted annually, comprising 1 percent of households. It provides information on the economic and social situation of the population.

1 With implementation of SGB II omission of the unemployment relief and introduction of new achievement forms

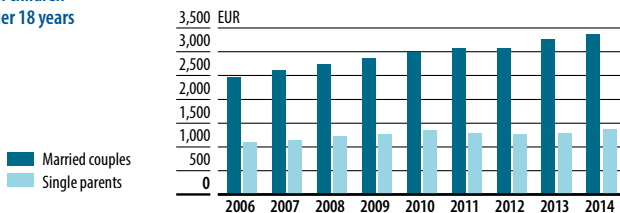

2 Since 2009 only parental benefit

04 Households and Families

Every community of persons living together and forming an economic unit as well as persons who live alone and, nevertheless, manage for themselves are counted as a household (private household). A household may include relatives and persons who do not belong to the family as such (e.g. partners in life). Married couples with children as well as single parents and unmarried couples with their unmarried children living in the same household are counted as families.

	Unit	2006	2010	2014

14 National Accounts

National accounts (VGR) are a statistical system for presenting a comprehensive, overall view of the economic activities of all business entities in Brandenburg. They are based on the European System of national accounts (ESA 2010) and the Classification of Industries (WZ 2008). At the centre of national accounts is the origin of the gross domestic product (GDP) as a measure of performance in Brandenburg.

	Unit	2006	2010	2014 ¹
Gross domestic product				
in current prices	EUR bn	50.8	56.1	61.9

including				
consumer insolvencies	number	3,704	4,273	3,475

The reports of traders are delivered monthly from the trading supervision departments. Information about insolvency of companies, consumers and other groups of borrowers provide the district courts.

¹ Establishment of businesses, without movings

² Without relocations; incl. closure of a branch office or dependent

branch (ie including "partial task of continuing operations")

16.1 Employment and compensation of employees

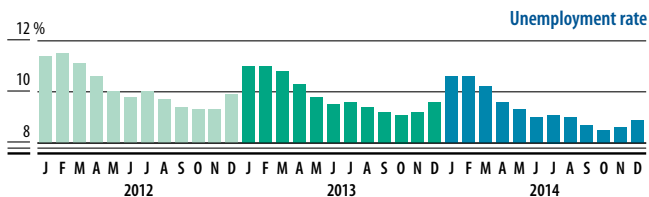

The number of employed persons along with their wages and salaries are determined within the scope of national account. The figures on the number of employed persons correspond to the workplace concept; that is, all employed persons who have their job in Brandenburg are taken into consideration. In the result for income creation the figure for employee earnings reflects all of the cash and non-cash benefits accrued to employees working in Brandenburg from work or other employment relationships.

	Unit	2006	2010	2014 ¹
Persons engaged in economic activity

2 Unemployed persons as % of all civilian employees (employees subject to social insurance and employees at a

low level, officials and unemployed persons additionally self-employed persons and family workers), as of 30 June on previous year

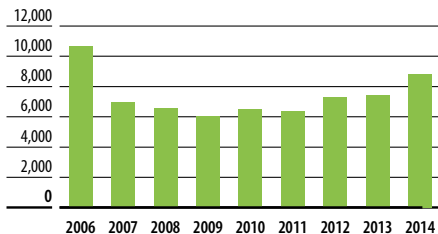

17 Construction, Housing

In the area of construction activity and housing construction activity statistics and the updating of the residential buildings and housing stock are located. The building and housing inventory is updated between the building and housing censuses, with the construction statistics. The actual results for 2014 are based on the final results of the building and housing census 2011.

The foreign trade statistics provide figures with regard to the movement of goods across the frontiers (export and import) between Brandenburg and foreign countries. The basis for the results is provided by the customs documents of importers and exporters in the trading industry with countries outside of the European Union (extra trade) as well as the statistical registrations of acquisitions and deliveries within the community within the meaning of the Value-Added Tax Law (intra trade).

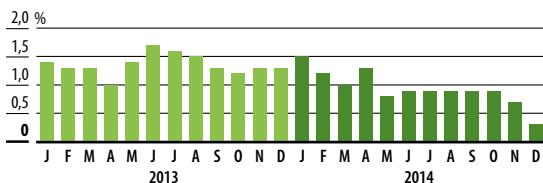

21 Consumer Prices

The consumer price index, shows the price development of all goods and services purchased by private households for consumption purposes, relative to a base year (here: 2010). The change in the consumer price index compared to the same month last year is also known as "inflation".

The parties received parliamentary seats in accordance with their share of the valid second votes. A party which won more direct parliamentary seats than it was entitled to in accordance with its share of the second votes in the entire polling area was authorised to retain such seats won in addition to the number gained through proportional representation. The other parties received as many compensatory seats as were required for allocation of the parliamentary seats in accordance with the proportion of the second votes.
